## Contents

### *Articles*

- 155–167**    **Brill, Richard, Molly Lutcavage, Greg Metzger,  
Peter Bushnell, Michael Arendt, Jon Lucy,  
Cheryl Watson, and David Foley**  
Horizontal and vertical movements of juvenile bluefin tuna  
(*Thunnus thynnus*) in relation to oceanographic conditions of the  
western North Atlantic, determined with ultrasonic telemetry
- 168–180**    **Chase, Bradford C.**  
Differences in diet of Atlantic bluefin tuna (*Thunnus thynnus*) at five  
seasonal feeding grounds on the New England continental shelf
- 181–192**    **Comeau, Michel, and Fernand Savoie**  
Movement of American lobster (*Homarus americanus*) in the  
southwestern Gulf of St. Lawrence
- 193–199**    **Else, Page, Lewis Haldorson, and Kenneth Krieger**  
Shortspine thornyhead (*Sebastolobus alascanus*) abundance and  
habitat associations in the Gulf of Alaska
- 200–213**    **Hatfield, Emma M.C., and Steven X. Cadrin**  
Geographic and temporal patterns in size and  
maturity of the longfin inshore squid (*Loligo pealeii*)  
off the northeastern United States
- 214–227**    **Hesp, Sybrand A., Ian C. Potter, and Norman G. Hall**  
Age and size composition, growth rate, reproductive biology, and  
habitats of the West Australian dhufish (*Glaucosoma hebraicum*) and  
their relevance to the management of this species
- 228–243**    **Kitada, Shuichi, and Kiyoshi Tezuka**  
Longitudinal logbook survey designs for estimating recreational  
fishery catch, with application to ayu (*Plecoglossus altivelis*)
- 244–257**    **MacFarlane, R. Bruce, and Elizabeth C. Norton**  
Physiological ecology of juvenile chinook salmon  
(*Oncorhynchus tshawytscha*) at the southern end of their distribution,  
the San Francisco Estuary and Gulf of the Farallones, California

---

The conclusions and opinions expressed  
in *Fishery Bulletin* are solely those of the  
authors and do not represent the official  
position of the National Marine Fisher-  
ies Service (NOAA) or any other agency  
or institution.

The National Marine Fisheries Service  
(NMFS) does not approve, recommend, or  
endorse any proprietary product or pro-  
prietary material mentioned in this pub-  
lication. No reference shall be made to  
NMFS, or to this publication furnished by  
NMFS, in any advertising or sales pro-  
motion which would indicate or imply  
that NMFS approves, recommends, or  
endorses any proprietary product or pro-  
prietary material mentioned herein, or  
which has as its purpose an intent to  
cause directly or indirectly the advertised  
product to be used or purchased because  
of this NMFS publication.

- 258–265**    **McFee, Wayne E., and Sally R. Hopkins-Murphy**  
Bottlenose dolphin (*Tursiops truncatus*) strandings in South Carolina, 1992–1996
- 266–278**    **Natanson, Lisa J., Joseph J. Mello, and Steven E. Campana**  
Validated age and growth of the porbeagle shark (*Lamna nasus*) in the western North Atlantic Ocean
- 279–298**    **Olson, Robert J., and Felipe Galván-Magaña**  
Food habits and consumption rates of common dolphinfish (*Coryphaena hippurus*) in the eastern Pacific Ocean
- 299–306**    **Powles, Perce M., and Stanley M. Warlen**  
Recruitment season, size, and age of young American eels (*Anguilla rostrata*) entering an estuary near Beaufort, North Carolina
- 307–323**    **Shima, Michiyo, Anne Babcock Hollowed, and Glenn R. VanBlaricom**  
Changes over time in the spatial distribution of walleye pollock (*Theragra chalcogramma*) in the Gulf of Alaska, 1984–1996
- 324–337**    **Starr, Richard M., John N. Heine, Jason M. Felton, and Gregor M. Cailliet**  
Movements of bocaccio (*Sebastes paucispinis*) and greenspotted (*S. chlorostictus*) rockfishes in a Monterey submarine canyon: implications for the design of marine reserves
- 338–350**    **Steele Philip, Theresa M. Bert, Kristine H. Johnston, and Sandra Levett**  
Efficiency of bycatch reduction devices in small otter trawls used in the Florida shrimp fishery
- 351–375**    **Vaughan, Douglas S., and Michael H. Prager**  
Severe decline in abundance of the red porgy (*Pagrus pagrus*) population off the southeastern United States

*Notes*

- 376–380**    **Abookire, Alisa A., John F. Piatt, and Suzann G. Speckman**  
A nearsurface, daytime occurrence of two mesopelagic fish species (*Stenobrachius leucopsarus* and *Leuroglossus schmidtii*) in a glacial fjord
- 381–385**    **Link, Jason S., and Frank P. Almeida**  
Opportunistic feeding of longhorn sculpin (*Myoxocephalus octodecemspinosus*): Are scallop fishery discards an important food subsidy for scavengers on Georges Bank?
- 386–389**    **Romanov, Evgeny V., and Veniamin V. Zamorov**  
First record of a yellowfin tuna (*Thunnus albacares*) from the stomach of a longnose lancetfish (*Alepisaurus ferox*)
- 390**    *Subscription form*

**Fishery Bulletin 100(2):155–390, April 2002**

The *Fishery Bulletin* (ISSN 0090-0656) is published quarterly by the Scientific Publications Office, National Marine Fisheries Service, NOAA, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115-0070. Periodicals postage is paid at Seattle, WA, and at additional mailing offices. POSTMASTER: Send address changes for subscriptions to *Fishery Bulletin*, Superintendent of Documents, Attn.: Chief, Mail List Branch, Mail Stop SSOM, Washington, DC 20402-9373.

Although the contents of this publication have not been copyrighted and may be reprinted entirely, reference to source is appreciated.

The Secretary of Commerce has determined that the publication of this periodical is necessary according to law for the transaction of public business of this Department. Use of funds for printing of this periodical has been approved by the Director of the Office of Management and Budget.

**For sale** by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year: \$45.00 domestic and \$56.25 foreign. Cost per single issue: \$28.00 domestic and \$35.00 foreign. **See back for order form.**

---

The *Fishery Bulletin* carries original research reports and technical notes on investigations in fishery science, engineering, and economics. It began as the Bulletin of the United States Fish Commission in 1881; it became the Bulletin of the Bureau of Fisheries in 1904 and the *Fishery Bulletin* of the Fish and Wildlife Service in 1941. Separates were issued as documents through volume 46; the last document was No. 1103. Beginning with volume 47 in 1931 and continuing through volume 62 in 1963, each separate appeared as a numbered bulletin. A new system began in 1963 with volume 63 in which papers are bound together in a single issue of the bulletin. Beginning with volume 70, number 1, January 1972, the *Fishery Bulletin* became a periodical, issued quarterly. In this form, it is available by subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available free in limited numbers to libraries, research institutions, State and Federal agencies, and in exchange for other scientific publications.

# Fishery Bulletin

## Guidelines for contributors

### Content of papers

#### Articles

Articles are reports of 10 to 30 pages (double spaced) that describe original research in one or a combination of the following fields of marine science: taxonomy, biology, genetics, mathematics (including modeling), statistics, engineering, economics, and ecology.

#### Notes

Notes are reports of 5 to 10 pages without an abstract that describe methods and results not supported by a large body of data. Although all contributions are subject to peer review, responsibility for the contents of articles and notes rests upon the authors and not upon the editor or the publisher. It is therefore important that authors consider the contents of their manuscripts carefully. Submission of an article is understood to imply that the article is original and is not being considered for publication elsewhere. Manuscripts must be written in English. Authors whose native language is not English are strongly advised to have their manuscripts checked for fluency by English-speaking colleagues prior to submission.

### Preparation of papers

#### Text

**Title page** should include authors' full names and mailing addresses (street address required) and the senior author's telephone, fax number, e-mail address, as well as a list of key words to describe the contents of the manuscript. **Abstract** must be less than one typed page (double spaced) and must not contain any citations. It should state the main scope of the research but emphasize the author's conclusions and relevant findings. Because abstracts are circulated by abstracting agencies, it is important that they represent the research clearly and concisely. **General text** must be typed in double-spaced format. A brief introduction should state the broad significance of the paper; the remainder of the paper should be divided into the following sections: Materials and methods, Results, Discussion (or Conclusions), and Acknowledgments. Headings within each section must be short, reflect a logical sequence, and follow the rules of multiple subdivision (i.e. there can be no subdivision without at least two subheadings). The entire text should be intelligible to interdisciplinary readers; therefore, all acronyms and abbreviations should be written out and all lesser-known technical terms should be defined the first time they are mentioned. The scientific names of species must be written out the first time they are mentioned; subsequent mention of scientific names may be abbreviated. Follow *Scientific style and format: CBE manual for authors, editors, and publishers* (6th ed.) for editorial style and the most current issue of the *American Fisheries Society's common and scientific names of fishes from the United States and Canada* for fish nomenclature. Dates should be written as follows: 11 November 1991. Measurements should be expressed in metric units, e.g. metric tons (t). The numeral one (1) should be typed as a one, not as a lower-case el (l).

#### Footnotes

Use footnotes to add editorial comments regarding claims made in the text and to document unpub-

lished works or works with local circulation. Footnotes should be numbered with Arabic numerals and inserted in 10-point font at the bottom of the first page on which they are cited. Footnotes should be formatted in the same manner as citations. If a manuscript is unpublished, in the process of review, or if the information provided in the footnote has been conveyed verbally, please state this information as "unpubl. data," "manuscript in review," and "personal commun.," respectively. Authors are advised wherever possible to avoid references to nonstandard literature (unpublished literature that is difficult to obtain, such as internal reports, processed reports, administrative reports, ICES council minutes, IWC minutes or working papers, any "research" or "working" documents, laboratory reports, contract reports, and manuscripts in review). If these references are used, please indicate whether they are available from NTIS (National Technical Information Service) or from some other public depository. Footnote format: author (last name, followed by first-name initials); year; title of report or manuscript; type of report and its administrative or serial number; name and address of agency or institution where the report is filed.

#### Literature cited

The literature cited section comprises works that have been published and those accepted for publication (works in press) in peer-reviewed journals and books. Follow the name and year system for citation format. In the text, write "Smith and Jones (1977) reported" but if the citation takes the form of parenthetical matter, write "(Smith and Jones, 1977)." In the literature cited section, list citations alphabetically by last name of senior author: For example, Alston, 1952; Mannly, 1988; Smith, 1932; Smith, 1947; Stalinsky and Jones, 1985. Abbreviations of journals should conform to the abbreviations given in the *Serial sources for the BIOSIS previews database*. Authors are responsible for the accuracy and completeness of all citations. Literature citation format: author (last name, followed by first-name initials); year; title of report or article; abbreviated title of the journal in which the article was published, volume number, page numbers. For books, please provide publisher, city, and state.

#### Tables

Tables should not be excessive in size and must be cited in numerical order in the text. Headings in tables should be short but ample enough to allow the table to be intelligible on its own. All unusual symbols must be explained in the table legend. Other incidental comments may be footnoted (use italic arabic numerals for footnote markers). Use asterisks only to indicate probability in statistical data. Place table legends on the same page as the table data. We accept tables saved in most spreadsheet software programs (e.g. Microsoft Excel). Please note the following:

- Use a comma in numbers of five digits or more (e.g. 13,000 but 3000).
- Use zeros before all decimal points for values less than one (e.g. 0.31).

#### Figures

Figures include line illustrations, computer-generated line graphs, and photographs (or slides). They

must be cited in numerical order in the text. Line illustrations are best submitted as original drawings. Computer-generated line graphs should be printed on laser-quality paper. Photographs should be submitted on glossy paper with good contrast. All figures are to be labeled with senior author's name and the number of the figure (e.g. Smith, Fig. 4). Use Helvetica or Arial font to label anatomical parts (line drawings) or variables (graphs) within figures; use Times Roman bold font to label the different sections of a figure (e.g. A, B, C). Figure legends should explain all symbols and abbreviations seen within the figure and should be typed in double-spaced format on a separate page at the end of the manuscript. We advise authors to peruse a recent issue of *Fishery Bulletin* for standard formats. Please note the following:

- Capitalize the first letter of the first word of axis labels.
- Do not use overly large font sizes to label axes or parts within figures.
- Do not use boldface fonts within figures.
- Do not create outline rules around graphs.
- Do not use horizontal lines through graphs.
- Do not use large font sizes to label degrees of longitude and latitude on maps.
- Indicate direction of degrees longitude and latitude on maps (e.g. 170°E).
- Avoid placing labels on a vertical plane (except on y axis).
- Avoid odd (nonstandard) patterns to mark sections of bar graphs and pie charts.

#### Copyright law

*Fishery Bulletin*, a U.S. government publication, is not subject to copyright law. If an author wishes to reproduce any part of *Fishery Bulletin* in his or her work, he or she is obliged, however, to acknowledge the source of the extracted literature.

#### Submission of papers

Send four printed copies (one original plus three copies)—clipped, *not stapled*—to the Scientific Editor, at the address shown below. Send photocopies of figures with initial submission of manuscript. Original figures will be requested later when the manuscript has been accepted for publication. Do not send your manuscript on diskette until requested to do so.

Dr. John V. Merriner  
Scientific Editor, *Fishery Bulletin*  
Center for Coastal Fisheries and Habitat  
Research, NOS  
101 Pivers Island Road  
Beaufort, NC 28516

Once the manuscript has been accepted for publication, you will be asked to submit a software copy of your manuscript. The software copy should be submitted in WordPerfect or Word format (in Word, save as Rich Text Format). Please note that we do not accept ASCII text files.

#### Reprints

Copies of published articles and notes are available free of charge to the senior author (50 copies) and to his or her laboratory (50 copies). Additional copies may be purchased in lots of 100 when the author receives page proofs.
